Onslow

Bull Sale
28th August 2017

The beef industry has been steadily cruising to a level that has not been experienced in the past 50 years. Premiums are being recorded for premium quality and consistently prepared presented cattle with the basic traits that fit into the world meat requirements. One of the contributing factors for the stability in the industry is the diversity of world market requirements which enable Australia to sell clean, consistent beef.

Onslow has been selecting and breeding to these industry requirements whilst maintaining the commercial traits needed to sustain a functional and fertile herd. The Onslow stud is now located at "Glenarchy" near Cootamundra where a new sale complex has been prepared. The move is a part of the family's succession planning. David and family have moved to Wallendbeen where some of our cattle remain.

LOT 2 ONSLOW REGENT L388

Bulls this year have had an indifferent preparation to previous sale preparation because of the move to "Glenarchy" - a tight summer, early autumn and limited green oats. As usual the Onslow bulls have size, structure and balance with that excellent length of body. The 30 two year old bulls and 30 yearling bulls, on offer on Monday 28th August, are bred from a select group of sires. This past season saw many clients market Onslow blood weaners throughout Southern NSW with outstanding results. They were consistently commented on for their type, length, thickness and softness.

A new sire represented this year is Bannaby Design G25. A very complete moderate sized bull, selected by Steve Ridley, that has helped blend balance, quality and most importantly industry traits. One of the most pleasing aspects of running a stud herd is selling drafts of bulls. During 2016 Onslow sold a run of 23 yearling and 21 older bulls to two old clients. This is over and above a number of 4-6 sires selected by clients in our annual sale.

FOR WEIGHT FOR AGE, QUALITY & LENGTH

This year Lot 1 will be sold with 70% of proceeds going to the Wal Hazlett Fund. Wal was involved in a helicopter accident 12 months ago in western Queensland and now after many months in hospital is receiving treatment at Making Strides. Wal's parents, Robert and Cheryl and brother Cameron are longtime clients and friends. With Wal's attitude and the assistance of his wife Chloe, their 2 young children and a very strong family around him, Wal has already shown progress with the therapy delivered by Making Strides. 15% of proceeds will go to Making Strides which is a spinal cord injury rehabilitation centre based on the Gold Coast. It has officially partnered with Griffith University to undertake two world class research studies on regenerating the damaged spinal cord.

15% will go to The Garvan Institute which conducts research into many diseases ranging from Cancer, Arthritis, Multiple Sclerosis, Parkinsons and Motor Neurone Disease to just name a few. We all know someone who has been affected by debilitating diseases and if we can assist with research it will be to our advantage.

LOT 1 ONSLOW RENNY L234

CLIENT'S SUCCESS

Paul Byrnes wrote "After being recommended by a neighbour to Onslow 5 years ago our 120 breeding herd haven't looked back - topping the Braidwood weaner sales the last 2 years.

2016 saw 51 steers average 356kg at \$1,142 and in 2017 55 steers averaged 321ks at \$1,318.

With myself in a wheelchair, temperament of our cattle is of the utmost importance and we have not been disappointed".

Paul fails to add that his top pen of steers this year sold for \$1,400
